

Solution Requirements

Date: 30 September 2026

Team ID: SWTID-2026-5793

Project Name: Standard Laptop Procurement Automation using ServiceNow Flow Designer

Maximum Marks: 4 Marks

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority
1	Authentication	The user should be authenticated before accessing the Service Catalog and submitting a laptop request.	High
2	Authorization Levels	Employees can submit requests, Managers can approve or reject requests, and the Hardware team can process assigned Catalog Tasks.	High
3	External Interfaces	The solution uses ServiceNow Service Catalog and Flow Designer components within the ServiceNow platform. No external third-party interface is required for the current project.	Low
4	Transaction Processing	The system should create a Requested Item when the employee submits a Standard Laptop request and process the request through the approval workflow.	High
5	Reporting	The system should allow users and IT teams to view the request, approval status, Requested Item, and associated Catalog Task.	Medium
6	Business Rules, etc.	Once the Standard Laptop request is approved, Flow Designer should automatically create a Catalog Task, update the required short description, and assign the task to the Hardware assignment group.	High

S.No	Requirement Category	Requirement Description	Priority
7	Compliance to Laws or Regulations	The system should follow the organization's access-control and data-handling requirements for employee and request information.	Medium
8	Other	The system should maintain a clear request lifecycle from Service Catalog submission through approval and Hardware task assignment.	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
1	Performance & Speed	The flow should process an approved request and create the Catalog Task without unnecessary delay.	Catalog Task is created automatically after successful approval.
2	Scalability	The solution should support multiple Standard Laptop requests using the same automated workflow.	Multiple requests can be processed without changing the flow for each request.
3	Security & Data Privacy	Only authorized users should access requests and perform approval or task-processing activities according to their roles.	Employee, Manager, and Hardware roles have appropriate access.
