

CODE-LAYOUT, READABILITY AND REUSABILITY

Date: 30 September 2026

Team ID: SWTID-2026-5793

Project Name: Standard Laptop Procurement Automation using ServiceNow Flow Designer

Maximum Marks: 5 Marks

Code Layout Checklist

S.No	Code Quality Parameter	Description	Followed	Remarks
1	Consistent Indentation	Uniform structure maintained in Flow Designer configuration	Yes	Flow steps are arranged in a clear sequence
2	Proper File Structure	ServiceNow components are logically organized	Yes	Catalog Item, Flow and Catalog Task are configured separately
3	Meaningful Variable Names	Variables and fields clearly represent their purpose	Yes	Standard Laptop and request-related fields are clearly identified
4	Function / Method Names	Actions are descriptively configured	Yes	Create Catalog Task and Update Record actions are clearly defined
5	Code Comments	Configuration is documented where required	Partial	Flow actions and descriptions provide process details
6	Modular Design	Workflow is divided into separate logical steps	Yes	Trigger, Approval, Task Creation and

	No			Assignment are separate steps
7	Redundant Code	Unnecessary or duplicate configuration is avoided	Yes	Only required Flow Designer actions are used
8	Error Handling	Request approval and processing conditions are handled	Yes	Approved and rejected request conditions are considered

Reusable Components / Modules

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level
1	Standard Laptop Catalog Item	ServiceNow Service Catalog	Laptop request process	High
2	Approval Process	ServiceNow Flow Designer	Request approval	High
3	Laptop Procurement Flow	ServiceNow Flow Designer	Approved requests	High
4	Create Catalog Task	ServiceNow Flow Designer	Hardware task creation	High
5	Hardware Assignment Group	ServiceNow	Catalog Task assignment	High

Overall Code Quality Assessment

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Workflow components are organized in a logical sequence
Readability	5	Flow actions and task descriptions are easy to understand
Reusability	5	Flow and catalog components can be reused for similar IT requests
Documentation / Comments	4	Configuration and workflow steps are documented clearly
Overall Score	5	The solution is structured, readable and reusable
