

CODING & SOLUTION

Date: 30 September 2026

Team ID: SWTID-2026-5793

Project Name: Standard Laptop Procurement Automation using ServiceNow Flow Designer

Maximum Marks: 5 Marks

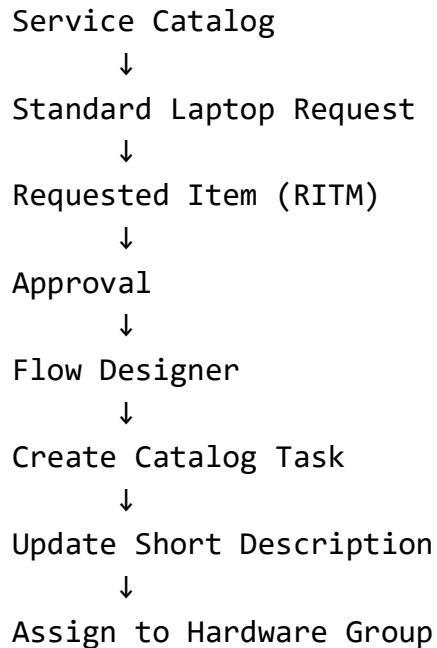

Solution Summary

Field	Details
Repository Link / URL	Not Applicable – ServiceNow Flow Designer Project
Programming Language(s)	Not Applicable – Configuration-based ServiceNow Workflow
Framework(s) Used	ServiceNow Flow Designer
Key Features Implemented	Service Catalog for Standard Laptop request, Approval process, Automated Flow, Catalog Task creation, Short Description update, Hardware assignment
Pending / Incomplete Features	None
Setup / Run Instructions	Login to ServiceNow → Open Service Catalog → Select Hardware → Select Standard Laptop → Place Order → Open Requested Item → Approve the request → Verify that the Catalog Task is automatically created and assigned to Hardware

Implemented Solution

The project automates the Standard Laptop procurement process using ServiceNow Flow Designer.

Workflow:

Code Quality Checklist

S.No	Criteria	Status
1	Workflow is modular and organized into logical actions	Yes
2	Meaningful names are used for Catalog Item, Flow and Tasks	Yes
3	Configuration includes clear descriptions where necessary	Yes
4	Approval and request conditions are handled	Yes
5	The workflow runs without critical errors	Yes
6	Solution configuration is maintained in ServiceNow	Yes

Additional Notes / Comments

The solution successfully automates the Standard Laptop procurement workflow. After the request is approved, Flow Designer automatically creates the required Catalog Task, updates the Short Description, and assigns the task to the Hardware assignment group. This reduces manual intervention and provides a consistent request-processing workflow.
