Project Title: Standard Laptop Procurement Automation using Flow Designer

Maximum Marks: 5 Marks

Project Proposal (Proposed Solution) Report

The proposal report aims to streamline the IT procurement process by automating standard laptop requests using ServiceNow Flow Designer. The solution reduces manual intervention and ensures that approved laptop requests are automatically converted into Catalog Tasks and assigned to the appropriate Hardware assignment group.

Project Overview

Objective

The primary objective is to automate the standard laptop procurement process by integrating the Service Catalog, approval process, Flow Designer, Requested Items, and Catalog Tasks, ensuring faster and consistent request processing.

Scope

The project covers the complete process of placing a Standard Laptop request through the Service Catalog, obtaining the required approval, and automatically creating and assigning a Catalog Task to the Hardware team after approval.

Problem Statement

Description

Manual processing of laptop procurement requests can result in delays, inconsistent task creation, and additional effort in assigning requests to the appropriate IT team.

Impact

Automating this process reduces manual work, improves processing efficiency, ensures proper task assignment, and provides a consistent workflow for standard laptop requests.

Proposed Solution

Approach

The proposed solution uses ServiceNow Flow Designer to automate the laptop procurement workflow. When a user submits a Standard Laptop request through the Service Catalog, the request is sent for approval. After approval, the flow automatically creates a Catalog Task, updates the required Short Description, and assigns the task to the Hardware assignment group.

Key Features

- Service Catalog for placing Standard Laptop requests.
- Approval process for submitted requests.
- Automated Flow Designer workflow.
- Automatic creation of Catalog Tasks after approval.
- Automatic assignment of tasks to the Hardware group.
- Automatic update of the Short Description.
- Improved tracking of the Requested Item and Catalog Task.

Resource Requirements

Resource Type	Description	Specification / Allocation
Hardware	Computing Resource	Laptop/Desktop

Memory	RAM	8 GB or above
Storage	Storage	256 GB or above
Software	Platform	ServiceNow
Development Tool	Workflow Tool	Flow Designer
Service	Request Management	Service Catalog
Database	ServiceNow Data	Requested Item / Catalog Task records
