

PERFORMANCE TESTING

Date: 30 September 2026

Team ID: SWTID-2026-5793

Project Name: Standard Laptop Procurement Automation using ServiceNow Flow Designer

Maximum Marks: 5 Marks

Step 1: Testing Overview

Field	Details
Testing Tool Used	ServiceNow Flow Designer / ServiceNow Platform
Type of Testing	Functional and Workflow Performance Testing
Target Module / API	Standard Laptop Service Catalog and Flow Designer
Test Environment	ServiceNow Development Instance
Test Date	30 September 2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration	Expected Outcome
1	Submit a Standard Laptop request through Service Catalog	1	30 sec	Request and RITM are created successfully
2	Approve the Standard Laptop Requested Item	1	30 sec	Request status changes to Approved
3	Execute Flow after approval	1	30 sec	Flow runs successfully

4	Create and assign Catalog Task	1	30 sec	Task is created and assigned to Hardware group
---	--------------------------------	---	--------	--

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status
1	Response Time (Avg)	< 2 seconds	Not measured	N/A
2	Response Time (Max)	< 5 seconds	Not measured	N/A
3	Throughput (Req/sec)	As required	Not measured	N/A
4	Error Rate	< 1%	No workflow errors observed	Pass
5	CPU Utilization	< 80%	Not measured	N/A
6	Memory Utilization	< 80%	Not measured	N/A

Step 4: Observations & Analysis

The Standard Laptop procurement workflow was tested in the ServiceNow development instance. The Service Catalog request was successfully created, the Requested Item was approved, and the Flow Designer automation executed the configured actions. After approval, the Catalog Task was created with the required Short Description and assigned to the Hardware assignment group.

No critical workflow errors were observed during the testing process.

Step 5: Screenshots / Evidence

Attach screenshots showing:

1. Standard Laptop Service Catalog Item
2. Submitted Requested Item (RITM)
3. Approved Request
4. Flow Designer execution
5. Created Catalog Task

6. Hardware Assignment Group
