

PROJECT EXECUTABLE FILES

Date: 30 September 2026

Team ID: SWTID-2026-5793

Project Name: Standard Laptop Procurement Automation using ServiceNow Flow Designer

Maximum Marks: 3 Marks

Step 1: Submission Checklist

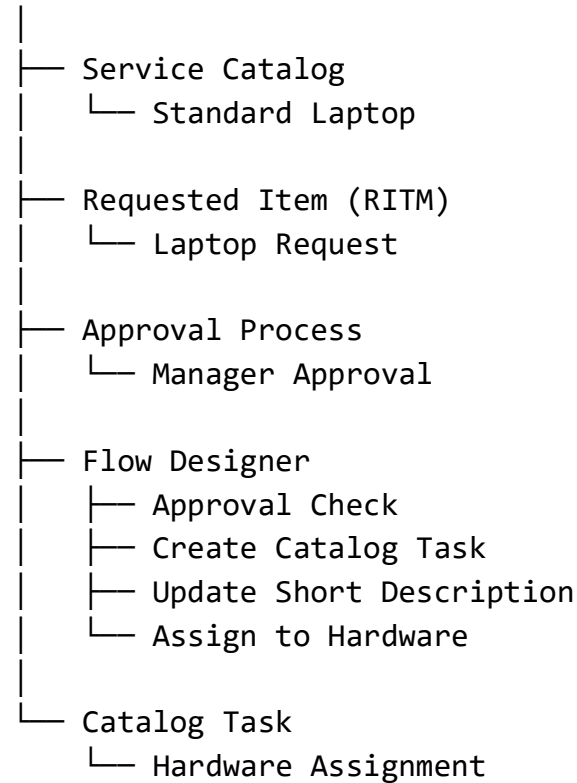

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	NA
2	README / Setup Guide	Yes
3	requirements.txt / package.json / dependency file	NA
4	Database schema / seed files	NA – ServiceNow platform tables are used
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL	NA – ServiceNow Development Instance
7	APK / Executable binary	NA
8	Dockerfile / Containerization config	NA
9	Test files and test results	Yes
10	Demo video or walkthrough	_____

Step 2: File / Folder Structure

This project is developed and configured using the ServiceNow platform. Therefore, a traditional source-code folder structure is not applicable.

ServiceNow Components

Standard Laptop Procurement Automation

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	ServiceNow Development Instance
Login Credentials	Evaluator access as provided by the team
Platform / Hosting Provider	ServiceNow
Repository Link	Not Applicable
Demo Video Link	_____

Step 4: Run Instructions

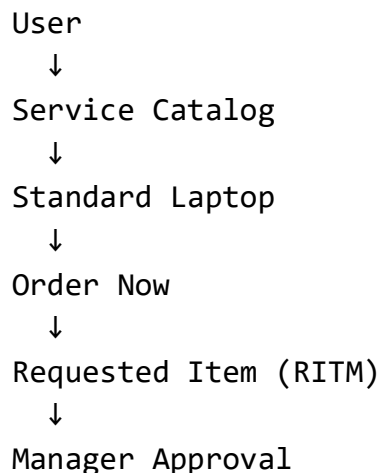

1. Login to the **ServiceNow Development Instance**.
2. Open **Service Catalog**.

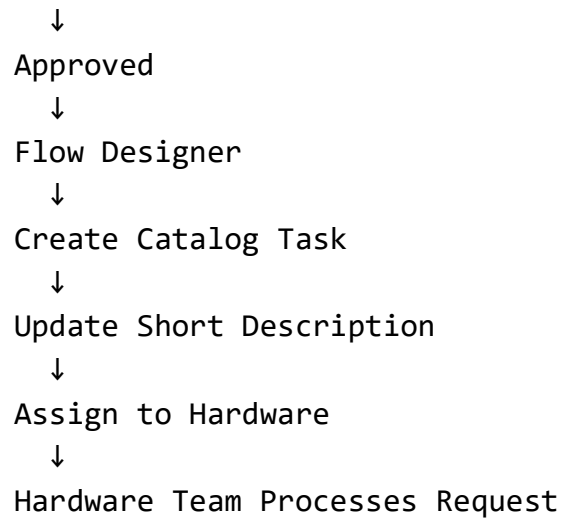

3. Navigate to the **Hardware** category.
4. Select **Standard Laptop**.
5. Click **Order Now**.
6. Submit the Standard Laptop request.
7. Open the generated **Requested Item (RITM)**.
8. Open the **Approvers** section.
9. Approve the Standard Laptop request.
10. Open the Requested Item after approval.
11. Navigate to the **Catalog Tasks** section.
12. Verify that the Catalog Task has been automatically created.
13. Verify that the **Short Description** has been updated.
14. Verify that the **Assignment Group** is set to **Hardware**.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	The project requires access to a ServiceNow Development Instance.	Provide valid ServiceNow instance access.
2	The solution is configured within ServiceNow and is not a standalone executable application.	Run and demonstrate the project through ServiceNow.
3	External API integration is not implemented.	Not required for the current project scope.
4	Repository-based source code is not applicable.	ServiceNow Flow Designer configuration is used instead.

Project Workflow

Final Project Outcome

The **Standard Laptop Procurement Automation** project automates the laptop procurement workflow using ServiceNow Flow Designer. After a user submits a Standard Laptop request and the request is approved, the system automatically creates a Catalog Task, updates its Short Description, and assigns the task to the **Hardware** assignment group. This reduces manual intervention and provides a consistent workflow for processing laptop requests.
